LAWN SOLUTIONS
AUSTRALIA

10kg
COVERS 400 - 1000M²

"IT ENHANCES THE HEALTH AND LOOK OF MY LAWN!"

Recommended for all lawns:

I use Lawn Solutions Australia's Fertiliser every 2 to 3 months and the results speak for themselves. This is a product I personally trust and use on the job and on the lawn at home.

As a lawn starter:

Lawn Solutions Australia's Fertiliser is ideal for new lawns as well as prior to laying.

Spread evenly and rake well into prepared top soil surface at half the application rates. (ie. Approx 12.5g/m²).

It is advisable to obtain full soil preparation advice from your turf supplier.

Lawn Solutions Fertiliser Premium Lawn Food

Lawn Solutions Australia's Fertiliser is a professional blend containing all the essential nutrients and trace elements suitable for all lawn types. Ideal for home lawns, sports fields & golf courses. Contains fast & slow release granules for best all round results.

PERFORMANCE GUARANTEE:
If you are not completely satisfied with the results achieved from the use of this product we will gladly refund the purchase price.

COVERAGE:
To calculate your coverage simply multiply your lawn area (m²) by the rate recommended for your lawn (see application rate table below).

Eg 1: 400m² block of Buffalo
Rate = 2.5kg/100m²
ie. 4 x 2.5kg = 10kg to cover 400m²

Eg 2: 400m² block of Sir Grange
Rate = 1kg/100m²
ie. 4 x 1kg = 4kg to cover 400m²

APPLICATION:

Apply evenly over lawn surface at the below rate using either a fertiliser spreader (use manufacturer's settings) or apply by hand. If hand spreading, the average adult hand holds approximately 50g of this product.

Use a smooth motion when spreading by hand. For even coverage, walk in a 'criss-cross' pattern whilst spreading. (Keep in mind the application rate when doing so).

Water in well immediately following application to avoid burning.

QUICK TIPS:

- Avoid applying to new lawns until after first mowing.
- Water in well immediately after application.
- Avoid using when temperature is expected to exceed 30°C.

PRECAUTIONS:

Keep out of reach of children. Plant nutrients can cause staining of sidewalks. Sweep walkways prior to irrigation. Walkways should be dry at time of application. Harmful if swallowed. The dust from this product may act as an irritant. Avoid inhalation and contact with the eyes and skin.
